---

The Gasco meeting to discuss the off-shore groundwater workplan has been moved up to 1:30. I think this is the final change☺

The meeting agenda includes:

- Workplan objectives
- Review of the December 19<sup>th</sup> DEQ letter commenting on the preliminary draft off-shore workplan.

Attached for your reference are:

- Regulatory review comments on the preliminary draft off-shore groundwater work plan.
- DEQ review comments on the November 17<sup>th</sup> NW Natural effort to identify technologies and alternatives for evaluation in the groundwater source control focused feasibility study.
- Revised Preliminary ID of Groundwater Technologies Memo.

The last two documents are provided because NW Natural clarifies in them they proposed to use the results of the in-water work to determine and direct the need for groundwater source control. This was not a clearly stated objective in the preliminary draft of the off-shore groundwater work plan. DEQ is currently reviewing the recent groundwater technologies tech memo. It is clear that the strategy proposed by NW Natural is not consistent with the Joint Source Control Strategy. DEQ is not seeking EPA/Partner review on the groundwater technologies tech memo at this time but wanted to provide it as elements of it are likely to come up during the discussion of work plan objectives. Please note that I do not have electronic copies of the referenced figures and addendum at this time.

Matt

**Subject:** Gasco Meeting

The Gasco team got back to me and can meet at 2:30 this Friday at DEQ (Room E). The purpose of the meeting is to review the objectives of the in-water groundwater work plan that NW Natural submitted and the comments that DEQ, EPA and Partners provided comments on.

I do not expect that the meeting will get down to the detail of individual sampling locations. Consequently, folks should be able to fully participate by telephone if necessary.

Please let me know if you need to call in so we can set up the technology.
